

ACTIVE ANTS

After School Activity Program

PROGRAM OUTLINE

Active Ants is an 8-week social skills group aimed at supporting school aged children to develop the skills required to engage in after school activity opportunities. The therapy group focuses on developing the social and coordination skills required to successfully join in an after-school sport and activity program. The group is facilitated by an Occupational Therapist, in consultation with a multidisciplinary team

WHO IS IT FOR?

Primary school aged children who need assistance to develop social skills and motor skills.
